**E - hasanmaroof93@gmail.com**

Enthusiastic UI Developer with solid experience in both web agencies and e-commerce, exceptional flexible as well as a keen desire to improve and develop new skills. Excellent attention to detail and a high level of accuracy regarding quality and presentation of work. I am specialised in banking and finance, digital, Airlines safety management, e-commerce & tele-communication.

## **PROFESSIONAL PROFILE**

I'm competent in leveraging agile frameworks to provide a robust synopsis for high level overviews for UI/UX implementations. Iterative approach to corporate strategy to foster collaborative thinking to further strengthen the overall value proposition. I have strong experience in:

JavaScript, Typescript, ReactJS, Redux-Saga, Angular, JSX, Node, Webpack, ECMAScript6(ES6), Babel, HTML5, CSS3, SASS, LESS, SCSS, NPM, Bootstrap, Font Awesome, MaterialUI, Jest and Enzymes, PACT contract test, jQuery, REST API, GIT, Jira, MongoDB, MVC Framework, TDD, Agile Methodology, Visual Studio

## **PROFESSIONAL EXPERIENCE**

**Aug 2019 – Present**

**Senior UI / React Developer at Recruitment Smart Technology Ltd.**  
**Client: UI Centric, LONDON**

Currently working on a banking project for 10X Banking, providing solution to banks for managing products and features. Primarily responsible to design and develop reusable UI components using ReactJs, state management using Redux-Saga and responsive web application using styled component and Material-UI.

**Jan 2019 – July 2019**

**UI / React Developer at Tata Consultancy Service Ltd.**  
**Client: Rolls Royce, LONDON**

Work closely with internal development, product management and design team. Identifying ways to improve design and development process. Work with micro-Services teams on RESTful API designs- assist with future scripted API's and Web Socket investigations. Working within Agile development environment, in a multi-disciplinary team with a product and feature based focus. Assisting in development of software technical documents. The application is for pilot and ground staff of Singapore Airlines to understand the factor of the previous landing of the flight. Like is it the landing was smooth or hard if the landing of the flight is hard what factors are responsible for that. Technologies include (ReactJS, Redux-Saga, Typescript, Node, ECMAScript6, Bootstrap, Font-awesome, SASS, Echarts, d3Js, Jest, Enzyme, Web pack, Babel, NPM)

## **Achievements:**

Built a UI framework using React & Redux which extracts live flight data (AQD data) from the Singapore airlines and showcase it in different chart format for safety management on web application.

**Oct 2015 – Dec 2018**

**UI / (React/Angular) Developer at Infosys Ltd.**

**Clients: Halliburton and AT&T, USA**

Understand user requirements and come up with customized and white box solution. Prepare all technical documents deliverables, design level document, process flow document, job flow diagram for clients. Create Reusable UI components, Design Wireframes. Designing overall architecture of the web applications having a good eye on security and data protection issues. Writes simple and clean code and have excellent bug fixing and trouble shooting skills.

### **PROJECTS UNDERTAKEN:**

Worked on end to end development of an agile project which is creating an e-commerce portal for the client Halliburton using ReactJS, Typescript, NodeJS, LeafletJS (Map), MongoDB.

The e-commerce portal is a decentralized platform on the block chain. The platform is completely map based user can select their regions and it will show the oil wells nearby to them on the Map, and user can see the last 3 months buy and sell history. User can directly contact the oil well owners for their requirement, and all transaction related thing is done using block chain.

I was heavily involved through end to end development of e-ordering portal, copyright portal for AT&T, this is an agile project using latest Java Script technologies.

Technologies include (ReactJS, ES5, TypeScript, JavaScript, jQuery, HTML5, Bootstrap, LeafletJS, NodeJS, MongoDB, SASS, CSS).

### **Achievements:**

Developed chrome extension for client, which can track the users' history who logged in to the Client e-ordering portal.

Developed a complete copyright portal for AT&T -- <https://copyright.att.net/home>

This portal is CATO complain free; CATO complain is basically a set of rules provided by AT&T to make web page Accessible.

Developed e-ordering portal for AT&T, created reusable ReactJS component. In this portal user can come and order for their ipv4 or ipv6 connection.

Developed Blockchain transactions and map assisted decentralised platform-based ecommerce portal for Halliburton using React and Redux.

### **Own Project :-**

<https://hasanmaroof.xyz/> This my portfolio website(SPA) developed and managed by me.

Technologies used React, Typescript, Styled-Components, CSS3, Material-UI.

### **PROFESSIONAL DEVELOPMENT**

B. Tech. with CGPA 8.58/10, St. Thomas' College of Engineering & Technology, Kolkata, India, 2011-2015.

### **TRAINING & CERTIFICATIONS**

- Vocational training for 3 weeks in SAIL (Steel Authority of India Limited), Bhilai, Chhattisgarh
- Introduction to networking for complete beginners By Udemy.

### **LEADERSHIP**

- Event head of the coding challenge name "Codigo" in the college tech fest "SREY 2015"
